

Manta Trip – Rabi Island

From April to November, witness graceful manta rays gliding effortlessly over the vibrant reefs of Rabi Island, situated off the north-east Coast of Vanua Levu. These gentle giants feed at the surface and visit underwater cleaning stations, creating an unforgettable spectacle just beneath the waves. Snorkelling and freediving provide the rare chance to observe these magnificent creatures up close in their natural habitat. Capture a photo of a manta's unique belly markings, and we'll help identify it- contributing to our understanding of these magnificent creatures.
